Connecting to a Computer

1. Ensure the projector and your computer are turned off.
2. Connect one end of the D-SUB cable to the "VGA IN" connector on the projector; connect the other end to the VGA connector on the computer and tighten the screws.
3. Connect one end of the power cord into the AC power socket on the projector; connect the other end to an electrical outlet.
4. Turn on the projector first and then the computer.

Powering On the Projector

1. Connect the power cord.
2. Connect the input device to projector.
3. Remove the lens cap.
4. Turn on the projector and input device.
5. Adjust the position, focus and zoom.
6. Run your presentation.

Powering Off the Projector

1. Press the power button twice.
2. Do not remove AC Power cord from outlet until the projector fan shut down.
