I Safety Declaration

- 1. Please carefully and thoroughly read this safety guide.
- 2. Please keep this manual secure for future reference.
- 3. Please keep the unit dry.
- 4. Please avoid exposing this unit to sunlight.
- 5. Don't pour any liquid into this unit, otherwise it will cause damage or electric shock.
- 6. Please contact with a professional for handling this MP500 Player if the following situations occur:
 - Liquid penetrates into this unit
 - The unit is affected by damp
 - The operation of this unit is not normal, or the user can't return to normal operational status by consulting this manual
 - The unit is dropped or is damaged
- 7. Please don't use MP500 Player in the following situations:
 - While driving a vehicle
 - Carrying out dangerous work
 - Walking on the street
 - Any situation that needs full concentration
- 8. If you want to format the disk of MP500 Player, please select FAT32 to format it. Please don't carry out partition of the disk of MP500 Player.
- 9. Please don't use liquid or spraying agent to clean this unit. Please use soft, wet cloth to wipe this unit.
- 10. During listening with earphones, please adjust to suitable volume to avoid hearing from being damaged.
- 11. Note: Improper use of battery may cause explosion! Please correctly use the battery as per instruction stated in Section: Battery!
- 12. Don't throw used battery into the waste bin, it should be recycled.

II Product Description

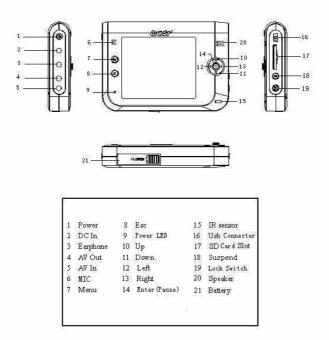

Thank you for purchasing this Acer MP-500 product. This kind of product is a high-performance portable multimedia recorder and player with removable Li-ion battery. With the use of Acer MP500 product, you can play video or MÚSICA files with different formats, which will bring you outstanding visual and MÚSICA experience. And you can record MÚSICA and video signals. This kind of product is also portable USB storage equipment and you can store and manage your personal data.

1. Main Features

- Display Supports 3.6" TFT LCD large screen display. Clearly displays picture and video files.
- Mass Storage Volume 1.8" 20GB in-board hard disk, which can store large amounts of data (30GB hard disk is optional)
- Video Play Supports the playing of video files with the formats of MPEG-4 SP, DivX 3.11/4.x/5x, DivX Pro 3.11/4.x/5.x, Xvid, and WMV-9 SP@ML.
- MÚSICA Play Support the playing of MÚSICA files with the formats of MP3 (MPEG1 Layer2, Layer3), and WMA (WMA 8/9).
- Lyric Synchronization Supports the synchronous display of sound and lyrics and educational texts.
- Image Viewing Supports the JPEG file format. You can copy images into the MP500 for viewing.
- Text File Reading Supports .txt text reading function (e-book function).

- Recording Supports the recording function of video and MÚSICA. You can use the unit to record video and MÚSICA signals from external sources.
- AV Input and Output Supports AV input interface. You can enjoy television programs through the large screen of MP500, and you can carry out remote control via infrared. Also supports AV output interface, and you can transfer video and MÚSICA signals the MP500 is playing to peripheral MÚSICA and video output devices (such as television).
- USB 2.0 Interface Supports USB 2.0 Full-Speed and Low-speed operation.
- SD/MMC Card Slot Supports Extended SD/MMC Card.
- Battery –Batería de Polímero de iones de litio.
- Video Format Conversion You can convert unplayable video files into playable format through video format conversion software.
- Multi-Languages Supports many languages, including eight language modes such as Simplified Chinese, Traditional Chinese, English, German, French, Italian, Holandésand Spanish.
- Firmware upgrade Support firmware upgrade.

2. Button Location

3. Packaging / Accessories

Please confirm the packaging and accessories have the contents below:

- ✓ Acer MP500 Player
- ✓ Batería de Polímero de iones de litio
- ✓ User's Manual
- ✓ Power Adapter
- ✓ Installation CD
- ✓ AV Cable
- ✓ USB cord

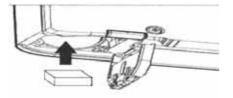

- ✓ Stereo earphones
- ✓ Remote Controller
- ✓ Portable leather cover

4. Charging of Battery

This section includes: installation of battery, charging of battery, and the use of external power adapter.

4.1 Installation of Battery

- 1) Confirm the power of MP500 player has been turned off, and open the cover of battery chamber as per the indicated direction.
- 2) Load the chargeable battery and close the cover of battery chamber.

4.2 Power Volume Indication

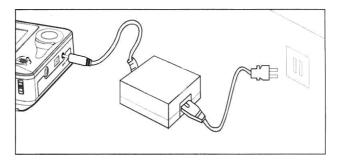

Battery is fully charged

Battery is partially drained

Battery is drained

Note: If the power volume indication of battery shows only one block or is empty, it indicates the power supply is obviously lacking, please charge the battery.

4.3 Charging of Battery

You can use the external power adapter to charge the battery. The charging can be performed when the power of MP500 Player is on or off. The detailed charging method is as follows:

- 1) Load the chargeable battery supplied with this unit.
- 2) Connect the power cable with the power adapter.
- 3) Insert the DC plugs of power adapter into the DC input port of MP500 Player.
- 4) Insert the power plug into the power socket.

Note: Please don't remove the battery during the charging process.

4.4 Use of External Power Adapter

You can use external power adapter to supply directly power for MP500 Player. The operation method is the same with the battery charging method.

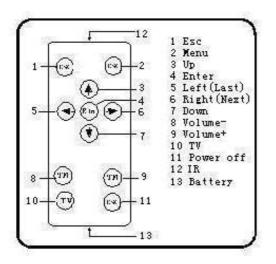

5. Connection of External Interface

- Connect Television for viewing Use AV cable to connect to AV out socket of MP500 Player and input socket of signal of television.
- Connect Television for Recording Connect the output socket of signal of television set and AV input socket of MP500 Player through AV cable.
- 3) Connection of MÚSICA Device Insert the AV cable into the AV input socket of MP500 Player. Connect the MÚSICA signal (left/right) of AV cable through "Y" type cable. Insert other end of Y type cable into the output socket of MÚSICA device.
- Connection of Computer Use USB cord to connect the MP500 Player with computer, for data transfer.
- 5) Connection of Stereo Earphones Insert the stereo earphones into the corresponding socket of MP500 Player.

6. Use of Remote Control (opcional)

This section describes how to use the remote controller to operate the MP500 Player. The key functions on the remote control correspond to the key functions of MP500 Player.

S/N	Remote Controller	Function
1	ESC	Escape (or back to the previous level)
2	MENU	Enter into the interface of menu
3	UP	Direction selection (up)
4	ENTER	Confirm
5	LEFT/LAST	Direction selection (left)/previous file
6	RIGHT/NEXT	Direction selection (right)/next file
7	DOWN	Direction selection (down)
8	VOLUME -	Decrease the volume
9	VOLUME +	Increase the volume
10	TV	Toggle the screen
11	POWER OFF	Power switch
12	IR	Infrared sensing port
13	Battery	Battery

7. Installation of USB Driver

USB driver only needs to be installed for Windows98/se operation system. The installation steps are as follow:

1) Insert the CD provided with this unit into the CD-ROM. Double click the Setup.exe file under the root directory of CD, and start the installation of driver.

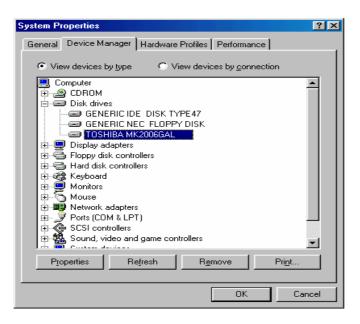

GL811EDriver_161	_98				
<u>F</u> ile <u>E</u> dit ⊻iew	<u>G</u> o F <u>a</u> vorites	<u>H</u> elp			1

Modified: 7/31/03 4:16 PM Size: 56KB	Setup	is BMonit			
			My Compul	ter	

2) Click <OK>, and restart computer. The installation of driver is finished;

Finish	×
The USB Storage driver has been installed comple	etely!
[OK]	

Confirm the USB driver has been installed.

- 1) Turn on the power of MP500 and use USB cord to connect with computer.
- 2) Select [Control Panel / System / Device Manager]. The following interface is to be displayed;

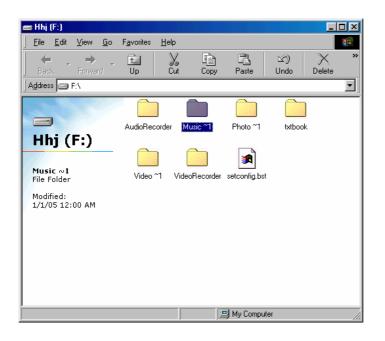

3) Select the hard disk drive and the installed USB driver will be displayed;

Note: If the USB driver hasn't been displayed as per the above, please uninstall the USB drive and reinstall it.

8. Disk Directory Management

1) When the host machine is normally connected with the computer, the disk icon will be displayed in [windows explorer]. There are six directories, [MÚSICA], [Vídeo], [photo], [textbook], [VideoRecorder] and [MÚSICARecorder];

Note: Please don't delete manually such default directories as [MÚSICA], [MÚSICA], [photo], [textbook], [VideoRecorder] and [MÚSICARecorder] under the root directory of disk because the deletion of such directories will result in the abnormal operation of this product. If these directories above have been deleted unintentionally, please re-open these directories after this unit is shut off, and the MP500 Player will automatically establish such directories for you.

- 2) Please store these files into the corresponding directories as per their types.
 - MÚSICA file MÚSICA directory: Video file
 - Vídeo directory:
 - Photo directory:

Picture file

Video record

- Electronic book Textbook directory:
- VideoRecorder directory:

MÚSICA record

MÚSICARecorder directory:

9. Safe Deletion from Computer

1) Select the icon of [plug and play device] in the task column, click right key and select [safely delete hardware];

- 2) Select the hardware device needing to be stopped, and click [Stop] button;
- 3) Select the drive needing to be stopped, and click [Confirmation] button;
- 4) Click [Close] button to finish the entire operation;

Note: Abnormal interruption of the connection of this product with the computer may cause damage to this product.

10. Power on / Power off

1) Power on: Hold down the on/off key for 2 seconds, and the screen will display the power on logo of Acer. It will enter into the interface of main menu.

2) Power off: Hold down on/off key for 2 seconds, and unit will turn off after [power off] is indicated in interface.

III Basic Functions

1. Selection of Main Menu

After the unit is turned on, the main interface will be displayed on the screen (as shown in the below figure).

Several icons are displayed on the main interface: video, MÚSICA, photo, e-book, record, files and setup. Press "Esc" key to hide the icon of main interface, and the background will appear clearly on the screen. If the icon of Menu key is pressed, it will be re-displayed on the main interface. Press four-direction key to select your desired functions (up, down, left and right), and press Enter key to confirm, and enter into the corresponding operational interface. Press Lock key for 2-3 seconds to turn on the function of locking keyboard, and re-press Lock key to turn off the function of locking keyboard.

0	J-

2. Video Play

1) Select video function on the main interface and press Enter key to confirm, and enter into the interface of video file list.

C:/video/asf/	1	1	a star	1
			2	
REC-HICHO-COL as	f			
0/ REC-HICHO-002. 22	+			

2) Press "menu" key to call up the file operation menu. The detailed operation method is shown in the description in the file operation section.

a. Desktop: Select "Desktop" to go back to the main interface.

- b. View, new, copy, move, paste, delete, rename
- c. File information: Open or close the file information column.
- 3) In the video file list interface, use 'up" or "down" keys to select your desired video file and press "Enter" key to start play.
- 4) During the playback of video, you can perform the following operations:
 - a. Press 'Esc" key to stop playback and back to the video file list.
 - b. Press "up" or "down" keys to adjust the volume of video play.
 - c. Press "Enter" key to Suspend playback, and press "Enter" to resume playback.
 - d. Press "left" or "right" keys to play previous file or next file.
 - e. Press "left" or "right" keys and hold for over 2 seconds to fast forward or rewind and enable a search with the playtime/progress bar, release the key to resume playback.

Note: The fast forward or rewind only works with video Suspendd.

f. During the playback of video, press "menu" key to display the icons of function menu.

II 🕨 📢 🖿 🖊 🏹 4:3

(Suspend, ff, rewind, next, previous, repeat mode, and ratio of width and height) (Repeat mode: single repeat, non-stop repeat)

4:3 (Ratio of width and height: 4:3, 16:9, original dimension display, ratio of width and height)

Note: Use "right" or "left" keys to select the menus above and use "Enter" key to confirm.

g. During selection of the functions of fast forward or rewind in the above menu, you can use "right" or "left" keys to change the rate of fast forward or rewind (X2, X4, X8, X16), and press "Enter" key to resume normal playback.

Note: The fast forward or rewind is performed while the video is playing. This function will help you to select precisely your desired playing position.

3. MÚSICA Enjoyment

1) Select "MÚSICA" function in the main interface and press "Enter" key to confirm, and to enter into the interface of MÚSICA file list.

2) Press "menu" key to call up the menu of file operation, and the detailed operation method is stated in the description of file operation section.

- a. Desktop: Select "Desktop" and return to the main interface.
- b. View, new, copy, move, paste, delete and rename: Refer to file operation description.
- c. File information: Open or close the file information column.
- 3) In the interface of MÚSICA file list, use "up" or "down" keys to select MÚSICA file, and press "Enter" key to confirm. Unit will enter into the MÚSICA play interface, and start to play MÚSICA.

Music 64KBPS 44100HZ
l'm Outta Here!.wma
00:00:31 / 00:03:17

- 4) During MÚSICA playback, you can perform the following operations:
 - a. Press "Esc" key to stop playback and return to file directory list.
 - b. Press "up" or "down" keys to adjust the volume of video playback.
 - c. Press "Enter" key once to Suspend the playback, and press "Enter" again to resume playback.
 - d. Press "left" or "right" keys and hold for over 2 seconds to fast forward or rewind and enable a search with the playtime/progress bar. Release the key to resume playback.
- 5) During the video playback period, press "menu" key to pop up the icon of MÚSICA function menu:

📕 🍽 🛃 😽 🏹 A=B ID3 EQ 🎜

(Suspend, fast forward, rewind, previous, next, repeat mode A-B repeat reading, ID3 information, EQ function, and background MÚSICA)

(Repeat mode: Single repeat, non-stop repeat, and random play)

ID3LRC (MÚSICA information, and display of LRC lyric)

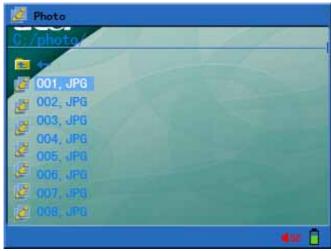

Note: Use "left" or "right" keys to select the above menu, and use "Enter" key to confirm. Press "Esc" or "Menu" keys to resume normal playback.

- 6) During MÚSICA playback period, the LRC file of lyric shall be Unicode encoding format, and the file name of lyric shall be in conformity with the file name of song. Use notebook of computer to open the downloaded lyric file and save as Unicode encoding.
- 7) Select background MÚSICA playback from the above menu, and the MÚSICA will continue to play on return to the upper level window.

4. View Photos

1) Select "photo" function in the main interface and press "Enter" key to confirm, and to enter into the interface of photo file list.

2) Press "menu" key to call up the file operation menu and the detailed operation method is shown in description of file operation section.

C:/photo/	Desktop

2 007, JPG	Information	

- a. Desktop: Select "Desktop" and return to the main interface.
- b. View, new, copy, move, paste, delete and rename: Refer to file operation description.
- c. File information: Open or close the file information column.

- 3) In the interface of photo file list, use "up" or "down" keys to select picture file, and press "Enter" key to confirm, and start to view photos.
- 4) During photo viewing, you can perform the following operations:
 - a. Press "Esc" key to stop photo viewing and return to file directory list.
 - b. Press "left" or "right" keys to display the previous photo or next photo.
- 5) During photo viewing, press "menu" key to pop out the picture function menu:

N K 🛱 🛛 🖈 🏞 🔑 🖊 4-PK 🔎

(Next, previous, view mode, setup as background, left rotation 90°, right rotation 90°, zoom out, zoom in, picture display mode, and background MÚSICA)

(View mode: Slide display, Suspend of slide display)

- 4-PIC 3-PIC 1-PIC (Picture display mode: Four pictures, nine pictures, and one picture)
- a. You can use the above menu to open or close the slide function. You can setup the display interval of slide in the setup menu.
- b. Desktop Background: Select "setup as background" function in the above menu, and the current picture will be set as desktop background. In the MP500, the stored pictures can be set as desktop background by using such function.
- c. Under the condition that the picture is zoomed out, use "up", "down", "left" and "right" keys to move the picture and press "Enter" key to exit the zoomed out status.
- d. Select Background MÚSICA in the above menu to change background MÚSICA and continue to view the pictures.

Note: If you want to play picture and MÚSICA synchronously, unit will first play MÚSICA and select background MÚSICA in the menu.

5. E-book Reading

1) Select "E-book" function in the main interface and press "Enter" key to confirm, and to enter into the interface of E-book file list.

2) Press "menu" key to call up the file operation menu and the detailed operation method is shown in the description of file operation section.

- a. Desktop: Select "Desktop" and return to the main interface.
- b. View, new, copy, move, paste, delete and rename: Refer to file operation description.
- c. File information: Open or close the file information column.
- 3) In the E-book file list interface: Use "up" or "down" keys to select E-book, and press "Enter" key to open and display electronic book on the screen.

(Previous file, next file, background MÚSICA)

Select Background MÚSICA in the above menu to change background MÚSICA (if the viewing pages are greater than 10 pages, the bookmark will be automatically saved).

Note: If you want to play the picture and MÚSICA synchronously, unit will first play MÚSICA and select background MÚSICA in the menu.

- 6) The supported file formats in the e-book are as follows: *.txt & *Irc, and the file encoding is Unicode.
- 6. Viewing and Recording of External Programs

Before powering on this unit, please use AV cable to connect the AV input connector of MP500 Player, and AV output connector of A/V device, respectively.

- 1) Program Record:
 - a. In the main interface, select "Record" and press "Enter" key to confirm that it has

entered into the recording interface.

Audio
HighQ

- b. Select the "RecKind": "Video", "MÚSICA" (only records MÚSICA) with signal input, and Voz (only recorded by microphone), and press "Enter" key to confirm.
- c. Select "Quality": HighQ, MediumQ, and LowQ, press "Enter" to confirm.
- d. Press "Esc" key to stop the recording, and close MP500 and remove AV cable.
- e. Press "Return" key to stop recording. Power off the MP500 and remove AV cord.
- f. During recording , you can select "Preview" function (press "Enter" key) to stop the recording, but the playback function is still active at that time. Press "Enter" key to continue the recording. Such function will allow you to preview while nothing is being recorded.
- 2) Video Output Function:
 - a. Please use AV cable to connect the AV output connector of MP500 Player and AV input connector of A/V device, respectively, to enjoy the large-screen video and stereo MÚSICA. (For the connection, please refer to the User's Manual of AV device).
 - b. Turn on the MP500 Player and TV or stereo MÚSICA device, and set up the MP500 for normal video or MÚSICA playback. Eventually press "Suspend" key (don't press it for a long time), the video will convert into TV display, and MÚSICA will convert into stereo MÚSICA device output. Pressing "Suspend" key again will stop AV output, and resume the display of MP500 Player.

Note: The setup of MP500 TV device shall be in conformity with the setup of TV during video output period. (The MP500 TV Setup is shown in setup menu, and TV Setup of TV is shown in User's Manual of TV device.)

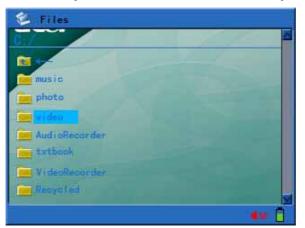

7. File Operation

1) In the main interface, select "file" and press "Enter" key to confirm that unit has entered into the selection interface of storage device. You can store the data file or MÚSICA or video files in the hard disk or extended storage device (such as SD/MMC card).

😂 Files

2) If your data file or MÚSICA file or video file is stored in the hard drive, select C drive, and press "Enter" key to enter into the file directory list interface.

3) Use "up" or "down" key to select the file or folder you want to access, and then press "menu" key to call up the file operation menu.

- a. Desktop: Select "Desktop" and return to the main interface.
- b. View: Select "view" to enter into the selected directory. (if the folder is selected, such operation will appear in the menu).
- c. Copy: Select the file or folder you want to copy, press "menu" key to call up the operation menu, select "copy", then press "Menu" key under the objective directory to call up the operation menu, select "paste", the window "Paste?" will appear, selecting "YES" will start the pasting, and selecting "NO", it will not paste. (If the file is selected, such operation will appear in the menu.)
- d. New Folder: Press "Menu" to call up the operation menu, and select "new" option. The name character list will appear after selection. Press "Menu" key to store after the folder is named, and the new folder is OK.
- e. Move: Rest the cursor on the file or folder to be moved, press "Menu" key to call up operation menu, select "move", the hint "Move?" will appear at that time. Select "Yes", and press "Menu" key under the objective directory to call up operation menu. Select paste, the hint "Paste?" will appear, then select "Yes" or "No".
- f. Paste: Used during the operations of copy and move.
- g. Delete: Rest the cursor on the file or folder to be deleted, press "Menu" key to call up operation menu, select "delete", and hint "Delete?" will appear at that time. Select "Yes" or "No".
- h. Rename: Rest the cursor on the file or folder to be renamed, press "Menu" key to call up operation menu, select "rename", and the name character list will appear at that time. Use direction key to select character, and the middle button of square key will confirm the input. Press "Menu" key to store name, and pressing "Esc" key will exit and will not perform rename operation.
- i. File Information: Open or close file information column.

8. Setup Menu

1) Select "Setup" in the main interface, and press "Enter" key to confirm, and to enter system setup interface.

System setup menu includes the following content:

- a. Display: This menu setup item includes backlight brightness, text color, focus text color and focus color.
 - Backlight Brightness: To setup the backlight brightness: 10% (10% of full brightness), 20% (20% of full brightness)...100% (full brightness).
 - Text Color: Color of unhighlighted text. Color values from 001 to 255.

Focus Text : Color of highlighted text. Color values from 001 to 255.

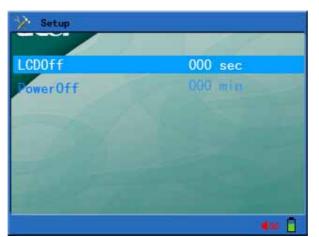

Focus Color: Color of highlight bar. Color values from 001 to 255.

Brightness	100%
Text Color	252
Focus Text	252
Focus color	252

b. Power Setup: This menu setup item includes backlight setup and power off.

Backlight Setup: For automatic shut off of the LCD backlight: 0 ~ 255 seconds are available, and 000 is power off (Disable this function).

d. Playback Mode Setup: This menu setup item includes picture interval time and MÚSICA playback mode.

Picture Interval Time: To setup automatic view interval of picture, 001 ~ 255 min are available.

MÚSICA Play Mode: To setup MÚSICA playback mode, three modes such as random play, play all, and single cycle.

9. Video File Format Conversion

WMV9 Video Conversion:

Microsoft Windows Media Encoder 9 Series can convert video/MÚSICA into Windows Media file format, which is a very strong conversion tool. The following will briefly introduce the conversion process and the steps of use of Windows Media Encoder.

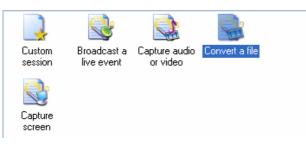

Notes: Computer system requirements:

- a. Windows Media Player9 or higher version.
- b. DirectX9.
- c. Windows Media Encoder9.
- You can download these software from the Microsoft website.

Using Windows Media Encoder, you can select the video file with suffixes of WMV, ASF, AVI, MPG, RM, RMVB and DAT as the source file to be converted.

After the source file to be converted is determined, you can select the conversion wizard, provided by the software in accordance with different demands, and customize output of the specifications of conversion file, such as resolution factor, frames, and baud rate, to meet your requirements.

 select the menu at the bottom left of Windows: "Start" → "Program (P)" → "Windows Media" → "Windows Media Encoder" to run Windows Media Encoder. Then select "Convert a file" item.

2) Select the source file to be converted in the source file column, and select the destination address and input file name in the output file column.

3) Click next step after typing the file name of output file, and select "Windows Media

Hardware Profiles" and click next step.

File download (computer playback) Hardware devices (CD, DVD, portable) Windows Media server (streaming) Web server (progressive download) Windows Media hardware profiles Pocket PC File archive

4) Select "Simple Video profile - medium (CBR)" in the video column

Simple video profile - medium (CBR)	~
Main video profile - high (CBR) Main video profile - medium (CBR)	
Main video profile - low (CBR)	
Simple video profile - medium (CBR) Simple video profile - low (CBR)	

Select "MÚSICA profile L1 (CBR)" IN THE MÚSICA column.

Audio profile L1 (CBR)

- 5) Click Next. Enter anything you like in the dialogue box or leave the box blank.
- 6) Click Next. Disable the option of "Single click 'Finish' to start conversion" in the setup check box and then click Finish.
- 7) Click "Properties", Ster Session 🔗 📊 📝 Properties 🖸 Start Encoding 🔘 Stop 🕕 Pause select

	"compression" in the dialogue property box Sources Output Compression Video Size Attribute					
remove the tick before the item of "two -pass encoding", mark tick before						
	"Time compression" Two-pass encoding Time compression, and select edit.					
8) Click to select the option of "355Kbps" General 355 Kbps in the custom box, change the "15fps" in the frame rate column t						
	Frame rate: 30 fps. Then click the "OK" button and the "Application"					

button to close the dialogue property box.

9) Click "Start Coding" and wait for the completion of coding.

10. Firmware Upgrade

You can download the firmware with new revision, and you can upgrade this product through the following steps.

- 1) Visit homepage of Acer Company (Http://www.acer-euro.com) and download the latest firmware file of this product.
- 2) Connect this product with the computer through USB cord.
- 3) Copy the latest firmware file to the root directory in the in-board hard disk of MP500 Player.
- 4) Normally disconnect the connection between this product and the USE cord of computer.
- 5) Restart this unit and the upgrade of this product will finish automatically.

Note: Please ensure the power capacity is enough before upgrade. If the power is interrupted during the upgrade process, this product may suffer serious damage. So, connect the power adapter before upgrade to ensure a continuous power supply.

IV Frequently Asked Questions and Solutions

This section will provide solutions for some common problems during the use of this product. Please read this section to see if it can resolve the existing problems. If they can't be resolved, please contact with customer service.

- 1. Question: The unit can't be turned on, and the LCD doesn't display any information. Answer: Please confirm if the battery needs to be charged.
- 2. Question: The keys don't work.

Answer: 1) Check if LCD will display "hold" message;

- 2) If the "hold" message is displayed, please press "Lock" key for 2 seconds to turn-off Lock function.
- 3. Question: When selecting the television as output mode, the television picture shakes or the picture can't be normally displayed.

Answer: When using television to view, please firstly setup correctly the [tv standard]. (In China and Europe, please use [pal], and in Korea, please use [ntsc].

4. Question: Sudden power off Answer: 1) Please check the [power off] setup in the [system set] of main menu interface;

2) Please check if the battery power is low, if so it should be charged.

- 5. Question: LCD screen suddenly powers off Answer: Please check if Suspend key is pressed and screen conversion has begun.
- 6. Question: Doesn't play video, MÚSICA and picture files.

Answer: 1) The file format shall be within the supporting scope of this product;

2) Please confirm if the file format belongs to the format supported by this product, and if the correct play mode is selected.

3) If the file format is not within the supported scope, please use the format conversion software described in this manual to convert the file format into the supporting format.

7. Question: There is no sound, or volume is too low during the playback of video and MÚSICA.

Answer: Please confirm if the volume is too low. Change the volume through the volume adjusting key.

8. Question: The menu is too small during video playback or picture view.

Answer: 1) The menu of recorded video file is too small.

2) The self-dimension of picture file is too small.

V Product Specifications

	Category	Parameter Specifications
System	Built-in Storage	1.8" 20GB Hard Disk
		SD/MMC / MMC Card
	File Management	Single file copy & paste, File/ Folder deletion,
		Rename and Folder Creation
	File System	FAT 16/32
User Interface Key Definition		Power, Suspend, Up, Down, Left, Right, Esc,
		Mode, Lock
	Remote Control	Infrared sensor
	Language	Multi-language Menu and Filename Display
	File View Mode	List View & Icon
Power Supply	Switching	AC 100-240V in, DC 5V, 2.4A output
	Adapter	
	Battery	Rechargeable Li-Polymer 3.7V/1800mAh
	Playback Time	Video: 4 hours, MÚSICA: 8 hours (average)
	Power Saving	Auto Power off, Screen saver and Hard Disk
		spin down
Display	Interface	3.5" TFT LCD
	Resolution	320×240 (RGB) Pixels
	Brightness	Backlight Adjustable
	View Angle	Up: 10deg, Down: 30deg
		Left: 45deg, Right: 45deg
AV Input /	Video	CVBS (PAL/NTSC)
Recording	MÚSICA	Line in Stereo
	Speech	Built-in Microphone
AV Output	Video	TV Line out (PAL/NTSC)
	MÚSICA	Line out Stereo
	Earphone	30mW, 320hm, 1 outlet
Firmware	DSP	System Auto Upgrade when Update File
Upgrade		available
USB 2.0	Device	USB 2.0 /USB 1.1 interface
		Operation System:
		Windows98/98SE/ME/2000XP
	.	Mac OS 9.0 and Later
General	Dimensions	126×82×24 mm
	Weight	220g wtth battery
	Operation	0 to 40
	Temperature	

Supported File Types And Functions

		File Type	Description
	Video	MPEG-4(*.ASF, *.AVI)	MPEG-4 Simple Profile 720*480 @ 30fps 2-channels MPEG-1 & 2 Layer3(MP3) Video Bit rate Up to 4Mbps
		MPEG-4(*.MP4)	MPEG-4 Simple Profile 720*480 @ 30fps 2-channels MPEG-4 AAC-LC Video Bit rate Up to 4Mbps
		XVID (*.AVI)	Up to 640*352 @ 30fps, MPEG-1&2 Layer III Video Bit rate Up to 3.5Mbps
Decoding		WMV9 (*.WMV or *.ASF)	WMV9 SP@ML 352*288 @ 30fps, WMA9 L2 Video Bit rate Up to 4Mbps Minimum Support 10fps
Docoding	MÚSIC A	MP3 (*.MP3)	MPEG-1&2 Layer III, sample rate up to 48KHz, Bit rate:24-320Kbps, CBR&VBR, 2-channels
		WMA (*.WMA)	WMA8/9 ,sample Rate up to 48KHz ,Bit rate :32-384Kbps,CBR , 2-channels
	Image	JPEG (*.JPG)	Baseline YUV and Grayscale (No progressive) Up to 3264*2448 Pixels for HDD
		GIF (*.GIF)	Static; Up to 1000*1000
		BMP (*.BMP)	Monchrome,8-bit Indexed-Color ,RGB ,RLE8 Up to 1400*1050
	Video	ISO MPEG-4 (*.ASF)	320*240 @ 30 fps, MP3 Stereo
Encoding	MÚSIC A	MP3 (*.MP3)	2 Channels : 16KHz ,32Kbps 24KHz , 64Kbps 32KHz , 96Kbps
