BIOS version 0813 adds support for Microsoft Windows 8*. Due to structural changes in this BIOS version, once a board has been converted to this version or later, it will no longer be possible to downgrade the BIOS to version 0012 or earlier. Attempting a BIOS downgrade to a previous version may fail - the board BIOS will remain at its current version.

If your board currently used BIOS version 0009 or 0010, first update it to version 0011 BEFORE updating to 0813.

When updating to version 0813 with the Express BIOS Update, upon completion it will show a message that the update was not completed. You can safely ignore this message.
