Intel® InBusiness™
Print Station

- **Connects printers to the network independent of PCs**

- **Supports two printers with single 10Base-T or 100Base-TX connection**

- **Increase productivity by conveniently locating printers**

- **Simple installation wizard**

The Intel® InBusiness™ Print Station is the easy way to share printers over a network. Set-up is so simple that within minutes your small business can be printing to shared printers over a 10 or 100 Mbps network. The Intel InBusiness Print Station is part of a complete line of networking products designed specifically for small business.

Easy
Printer Sharing

This device connects easily to your network and makes sharing a printer with multiple users a snap. The Print Station is independent of your PC, so it doesn't require memory resources from a shared workstation during the print cycle. This means that sharing printers with the Print Station will increase your office productivity.

Simple
Setup

A simplified wizard makes the product easy to install and configure in any Windows* 95, Windows 98, or Windows NT* environment.

Flexible

The Print Station supports up two printers so connection costs are less than half that of single port solutions.
Now printers can be located anywhere on your network. This means that you can put your printers in an area that is convenient for your employees instead of attaching printers to a PC and burdening that PC with printing tasks.

Compatible

The Print Station supports virtually any parallel port printer and will work on either a 10 or 100 Mbps network using auto-negotiation for easy installation.

**Intel® InBusiness™
Print Station**
with any 10Base-T or
100Base-TX Hub or Switch
